SUBJECT INDEX TO VOLUME 26

The Index comprises a consolidated list of titles of abstracts, compiled from the sectional contents lists of the individual issues.

Within the sections normally used (**GENERAL, NICKEL, ELECTRODEPOSITION,** etc.), the items are broadly classified in appropriate sub–sections, within which the items are entered in order of their appearance in the Bulletin. The only exceptions to such order are the grouping of the page numbers of serial items, and of items of very closely similar subject matter, and the alphabetical order used in the 'General' section.

The individual abstracts are, in most cases, entered under the substantive titles used when they were originally reported. Leading articles are listed separately, and are also shown in the appropriate sections. In the sections they are differentiated from abstracts by an asterisk at the beginning of the title.

LEADING ARTICLES

	Page
Spheroidal–Graphite Cast Iron: Data Sheet	34–5
Simple Tests for Identifying Some Nickel Alloys and Other Metals	48–9
Magnetic Properties of the Nickel–Iron Alloys: Data Sheet	74–5
Castings in Alloys of Nickel–Molybdenum–Iron, Nickel–Molybdenum–Chromium–Iron and Nickel–Silicon: Data Sheet	90–1
Twenty–Five Years Ago: Aims and Objects of *The Nickel Bulletin*	107
Ni–Hard: Data Sheet	162–4

GENERAL

	Page
(See also General and Testing Sub–Sections of other Sections)	
Atomic Theory in Relation to Metallurgy: Monograph	36
Coinage: The Royal Mint, etc.	53, 126
Electrolytic 'Thinning' of Metals	50
Fatigue of Metals: Symposium	165
Gas Turbines: General Progress Report on Development	84
* Identification Tests for Metals, Steels and Alloys	48, 103
Inorganic Analysis: Textbook	202
Powder Metals: Production, Properties, Uses: General Reviews and Symposia	108, 126, 165
Pickling of Metals and Alloys: Textbook	80
Thermal Treatment of Metals and Alloys: Symposium on Equipment	36
* Twenty–Five Years Ago. Aims and Objects of *The Nickel Bulletin*	107
U.S. Standardizing Bodies: Cross Index of Specifications	50

NICKEL

	Page
Analysis and Determination (see also **ELECTRODEPOSITION, Analysis of Solutions**)	
Monoximes as Reagents for Nickel and Other Metals	4
Determination of Nickel in Cracking Catalysts	4
Polarographic Determination of Nickel in Aluminium Alloys	5
Determination of Traces of Nickel in Oils	5
Spectrochemical Analysis of Nickel	5, 92, 184
* Simple Tests for Identifying Some Nickel Alloys and Other Metals	48
Estimation of Silicon in Nickel	54
Spectroscopic Determination of Nickel in Copper	95
Spot Test for Detection of Copper, Cobalt and Nickel	130, 204
Determination of Nickel in Cobalt Oxide	131
Colorimetric Determination of Nickel, Cobalt and Copper	165
Determination of Nickel in Permanent–Magnet Alloys: B.S. Schedule	170

Page

Analysis of Nickel Anodes and Salts for Electro-deposition: B.S. Schedule 184
Analysis of Nickel and Other Metals: Textbook 202
Sodium Acetate in Estimation of Nickel 204
Determination of Cobalt in Nickel and Nickel Alloys 208

Composition, Properties and Structure

Magnetization of Nickel as a Function of Temperature 3
Magnetostriction and the Δ–E Effect in Nickel 3, 81
Electrical Resistivity of Nickel as a Function of Drawing Temperature 3
Thermogalvanic Potential of Nickel in Neutral Sulphate Solutions 4
Catalytic Properties of Nickel, Cobalt and Nickel–Cobalt Catalysts 4, 51, 92 (corrig. 128), 109
Oxidation Characteristics of Nickel at High Temperatures 20, 60, 76, 147
Solubility and Diffusion of Carbon in Nickel: Nickel–base Oxide Cathodes 36, 129
Anodic Behaviour of Nickel 36
Wear and Friction Properties of Nickel 40, 41
Creep Characteristics of Nickel 58, 183
Behaviour of Evaporated Nickel Films on Annealing 76
Hall Effect in Nickel 80, 139
Saturation Magnetization of Nickel at High Pressure 92
Free Energy of Vaporization of Nickel 108
Field Emission from Nickel Surfaces 108
Magnetic Properties of Nickel: Symposium on Magnetic Materials 112, 113
Solid Solubilities of Carbides in Nickel 126
Manganese–Boron–Nickel Alloys 126
Thermal Conductivity of Nickel and Nickel Alloys 128
Nickel and Nickel Alloys in Electronic Equipment: Compositions and Properties 128
Ideal Magnetization in Nickel 140
Nickel Anodes Used in Electrodeposition: Typical Compositions 167
Corrosion and Porosity Tests on Nickel Foils 167
Influence of Addition Elements on Creep of Nickel 183
Energy Stored in Deformed Nickel: Release, etc. 183
Barkhausen Effect in Single Crystals of Nickel 184
Resistance to Corrosion by Biological Fluids 198
Electrical Conductance of Nickel Films 202
Internal Stresses in Nickel Wires 202
Domain Structure of Single Nickel Crystal 203
Nitriding of Nickel in Relation to its Curie Point 208

Conservation

General Discussion of Conservation during Emergency Periods 2
Conservation of Nickel: in Plating 7, 92
in Steel by Use of Boron 40, 116
Modified Regulations in U.K. 50
Removal of Restrictions by O.E.E.C. 183

Occurrence, Extraction and Recovery

Nickel: Occurrence, Properties, Uses: U.S. Bureau of Mines Survey 2
Mining of Nickel–containing Ores in the Sudbury Region 2, 76, 127
Occurrence of Nickel in Petroleum Distillates 5
Review of Developments in Mining of Nickel–containing and Other Ores 127
Iron–Ore Recovery from Nickel Ores 127
Hydrometallurgical Process for Extraction of Nickel 127
Recovery of Nickel from Plating Wastes by Ion Exchange 165
Electrodeposition in Extractive Metallurgy 185

Page

Powder Production and Use

Influence of Sintering Conditions on Properties of Nickel Powder Compacts 126
Production of Powders by Fusion Electrolysis 126
Nickel Powders produced from Amalgams 128
Nickel Powders currently available 165

Production and Processing (see also **Occurrence and Extraction,** and **Welding**)

U.S. Bureau of Mines Survey 2
Cast Nickel Anodes: Production and Properties 8
Equipment for Thermal Treatment of Metals: Monograph 36
Electrolytic 'Thinning' of Nickel 50
Production of Nickel Raney–Type Catalysts 51, 92 (corrig. 128), 128
Mining of Nickel–containing Ores in the Sudbury Region 76, 127
Nickel Production in Canada in 1952 76
Annealing of Evaporated Nickel Films 76
Pickling of Nickel 80
Enamelling of Sheet Nickel 130
Ceramic Coating of Nickel 202
Production of Single Crystals of Nickel 203

Specifications and Testing (see also **Analysis**)

A.S.T.M. Specifications for Nickel 37, 50
* Identification Tests for Metals and Alloys 48
Cross Index of U.S. Specifications 50
Specifications for Nickel and Nickel Alloys in Electronic Equipment 128
Anodes and Salts for Nickel Plating: B.S. Specification 184
Measurement of Internal Stresses in Nickel Wires 202

Uses: see also **HEAT- and CORROSION-RESISTING MATERIALS, Clad Materials**

Raney and Other Nickel Catalysts 4, 51, 92 (corrig. 128), 109
Nickel and Nickel Alloys in Electronic Equipment 36, 128, 129
Nickel Tubing for Transport of Caustic Soda 76
Nickel in Magnetostrictive Sonic Delay Line 92
Nickel Equipment in Salt-Producing Plant 130
Nickel–Alkaline Batteries: for U.S. Aircraft 130
: for Searchlights 203
Materials of Construction for Chemical Engineering: Literature Review, etc. 215

Nickel Powders:

Structure of Nickel Dimethylglyoxime 130
Toxicity of Metal Salts to Fish 166
Nickel Salts for Electroplating: B.S. Specification 184
Analysis of Nickel Sulphate 184, 204
Nickel–containing Compounds in Temperature–Indicating Paints 204

ELECTRODEPOSITION AND OTHER COATING METHODS

(See also **HEAT- AND CORROSION-RESISTING MATERIALS, Clad and Faced Materials**)

Analysis of Solutions

Rapid Analysis of Nickel–Plating Solutions 9
Determination of Total Sulphates in Nickel–Plating Baths 53
Determination of Boric Acid in Nickel–Plating Baths 79
Analysis of Plating Solutions for Major Constituents 131
Spectrographic Analysis of Nickel–Plating Baths 133
Analysis of Nickel Salts for Electroplating: B.S. Specification 184
Analysis of Nickel Sulphate 184, 204
Determination of Impurities in Nickel–Plating Baths: Summary 185

Conservation of Nickel in Electrodeposition:

see **NICKEL, Conservation**

Electrodeposition of Nickel: Properties and Uses of Electrodeposited Nickel

Effects of Iron in Nickel–Plating Solutions: Methods for Removal 6
Alternatives to Nickel Plating: Industrial Experience 7, 92
Use of Sulphites in Nickel–Plating Baths 8
Current and Metal Distribution in Electrodeposition of Nickel 8, 167, 186
Properties of Electrodeposited Nickel: A.E.S. Report: Summary 8, 186
Nickel Anodes and Accessory Equipment 8, 167
Nickel Plating of Plastics 9
Nickel Plating of Stainless Steel before Brazing 9
Effect of Temperature on Cathode Potential in Electrodeposition of Nickel 52
Nickel Plating of Aluminium–base Materials:
  Zincate Pre–Treatment 52
  Zinc + Brass Pre–Treatment 78, 186
  Plating of Propeller Blades, using Rubber Bonding 134
  Phosphoric–Acid Pre–Plating Treatment 166
Electroplating of Magnesium 93
Maintenance of Nickel–Plating Solutions: Purification Plant 94
Black Nickel Plating 94
Peeling of Nickel Deposits: Causes and Prevention 109
Internal Nickel Plating of Tubing 110
Electrodeposition of Nickel: Technique, Properties of Deposits, etc. A.E.S. Convention 131
Influence of Polishing of Steel Base on Properties of Electrodeposited Nickel 131, 204
Effect of Chromium in Nickel–Plating Solutions: Methods for Removal 132
Steels used for Plating with Nickel 132
